

Discover “First” Wonders

Special 6 Class Series

Enjoy “6 weeks of wonder” and discover our world, light, sound and sensory explorations, movement and more! This tailor made series is designed to provide infants with important “firsts”; first discoveries of what they can do, how things look and feel and the first opportunity to begin to connect and wonder about the world around them...

Week 1: World of Colour

In our first week, children will explore the colours of the rainbow using all of their senses. From sorting coloured pom poms, to squishing and mixing paint in ziplock bags, to rolling playdough and even attempting to write with crayons on sandpaper which supports little hands in developing fine motor skills. Join us as we slide down the rainbow into 6 weeks of discovery!

Week 2: Baby Beluga

We will introduce children to the colours, sights, sounds and nature of the deep blue sea this week, as we use the story book “Baby Beluga” as our inspiration. Children will delight in small world animal displays using light and shadow, as well as an introduction to the cold sensation of ice! Brrrr!

Week 3: Hard and Soft

We will connect last weeks adventure with this weeks tactile journey as our sea animals are found in water beads providing children with the sensation of squishy, cold and wet. They will journey through sensory bags filled with a myriad of materials as well as treasure baskets, a variety of fruit and shredded paper (always a favourite!).

Week 4: Nature’s Bounty

We will take the fruit we discovered last week to lead us into this week where we discover the wonder and beauty of all nature has to offer. We will scoop, pour and transfer small vegetables from one vessel to another, will feel the strange sensation of lettuce leaves in our fingers and we will connect nature with a variety of helpful farm animals.

Week 5: ALL my senses

A child’s senses are the faculties they use to start to understand hard, soft, delicious, long, tall, thin, big, small for example. By providing educationally rich opportunities for tactile exploration we are supporting children in making sense of the world around them, making a connection with it and an understanding of it. This week we’ll listen, touch, squeeze, smell and look our way through and with this wonderful world!

Week 6: Spring into Spring!

In our final week, we will usher in the spirit of Spring with easter egg colour matching, vegetable explorations, sun and rain sensory bottles as well as our own slippery spring soup! Join us!

All the Details

Who: 6 - 18 month olds

When: 22 February to
29 March 2019

Time: Fridays 11:15 - 12:15pm

Where: Turf City AND
UE Square locations
