

# Discover “First” Wonders

## Special 6 Class Series

Enjoy “6 weeks of wonder” and discover animals, colours, sensory explorations, movement and more! This tailor made series is designed to provide infants with “firsts”; first discoveries of what they can do and the first opportunity to begin to wonder about the world around them...

### Week 1: Wildlife Explorations

Children delve into the world of animals and habitats, involving sensory bins with sand, leaves, ice, feathers and an expedition into the world of animals through light, wind and water bringing this week's focus to life!

### Week 2: A Rainbow in my Hands

Who says colour can only be seen? We make colour a multi-sensory experience through tactile, visual and olfactory experiences through scarf play, pom poms and fresh fruit & flowers that brings an awareness to color that's meaningful and engaging.

### Week 3: Pop, Squish, Bang...

Learning about cause and effect through interactions with a variety of materials that offer different responses to force and motion provides lots for infants to observe, feel and hear. Crush watermelon cubes, bang on cold metal bowls with spoons and ladles and understand how form can change as infants apply pressure to play dough...

### Week 4: Kicking, Pulling, Pinching - see what I can do!

As babies gain motor control, they enter into schematic play that results in repetitive actions that help them test theories about movement, trajectory and space. How hard do I kick the balloon to reach my mummy? Why does this crepe paper stick onto this window? Come discover motor coordination, dexterity and perseverance through space and motion!

### Week 5: We're going on a Bear Hunt. What's a hunt?

Storytelling creates bonds that make for the fondest memories and positive first experiences with early literacy and language. We take inspiration from Michael Rosen's classic "We're going on a bear hunt" recreating the hunt through rhythm and tempo inviting children on an adventure of spatial awareness...

### Week 6: All my senses

A child's senses are the faculties they use to start to understand hard, soft, delicious, long, tall, thin, big, small for example. By providing educationally rich opportunities for tactile exploration we are supporting children in making sense of the world around them, making a connection with it and an understanding of it. We wrap up this series as we listen, touch, squeeze, smell and look our way through and with this wonderful world!

## All the Details

Who: 6 - 18 month olds

When: 5th July to 9th August 2019

Time: Fridays 11:15 - 12:15pm

Where: Turf City & UE Square locations

\$240 per 6 class package  
Includes 1 Drop In Session  
or use current class packages.

UE Square, River Valley  
83 Clemenceau Avenue, #01-35/36  
UE Square Office Tower, Singapore, 239920
